Useful Info about Arnsberg

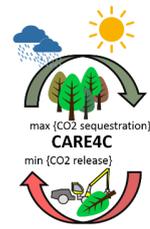

Arnsberg is the historical gateway to the "Land of the thousand hills", the Sauerland. Here rolling landscapes, clear lakes, green forests, lush meadows, and spotlessly clean timbered houses form the scenery. And Arnsberg as well, with its districts and villages, presents itself romantic, versatile and close to nature within a beautiful and well wooded countryside.

The Möhne Reservoir: It is an artificial lake in North Rhine-Westphalia, some 45 km east of Dortmund, Germany. The lake is formed by the damming of two rivers, Möhne and Heve, and with its four basins stores as much as 135 million cubic metres of water.

The dam was built between 1908 and 1913 to help control floods, regulate water levels on the Ruhr river downstream, and generate hydropower. Today, the lake is also a tourist attraction.
